"Y" SCORES SHOW EL PASO WINS

Hexathlon Team Is First in Class, Leads State, Is Fourth in Nation.

New York, April 3.—The El Paso Y. M. C. A. stands first in the whole United States in class C of the national Hexathlon recently conducted by the Y. M. C. A., having scored approximately 90 percent of the perfect score.

El Paso led the whole state of Texas, regarding classification, with Dallas second and Fort Worth third. El Paso was also fourth in the whole country, irrespective of class, and competing against such cities as New York, Chicago, Philadelphia, San Francisco, St. Louis and Boston.

Dr. Fisher, who had charge of the scores, regarding classification, said that the El Paso team was the best he had ever seen. He stated there were no competing associations in New Mexico and Arizona this year.

The various associations throughout the United States were divided into three classes for the purpose of this competition, the classes being graded according to the membership of the various associations. New York, Brooklyn, Philadelphia, Boston, Chicago, St. Louis, San Francisco, Seattle and several other of the larger cities were in the class A list, with over 100 members. The class B grade included all associations with from 75 to 100 members, while the class C was open to associations with less than 75 members.

The showing of the El Paso athletes is remarkable, for they not only led the entire United States in their class, but had better marks than any of the class B contestants, while only three of the class A associations returned better marks.

El Paso is getting a great amount of advertising in eastern papers for its excellent work in this contest and the fact that El Paso made better scores than many cities from five to 19 times its size.

DEMONSTRATOR TO BE CHOSEN

State Agent Proctor Comes to Make Selection For El Paso District.

W. F. Proctor, state agent in charge of farmer's cooperative demonstration work, arrived here Friday evening to look over the ground and consult with the chamber of commerce regarding an appointee for this district. Saturday Mr. Proctor, in company with George LeBaron, chairman of the agricultural committee, passed on a number of applications and it is probable that a demonstrator for this valley will be selected by the first of the week.

"The demonstrator brings the college to the farmer," said Mr. Proctor. "In every sense of the word, the work is strictly practical. The demonstrator will go to a farm here and find out what the farmer thinks of his soil and what he believes is the best crop. Say the farmer favors alfalfa. If satisfactory, the demonstrator will enter into a contract with him to grow 10 acres of alfalfa under the demonstrator's supervision. Exact figures are kept for a year, or during the growing and harvesting season. This 10 acres, then, has been a demonstration alfalfa farm for the whole valley. The process is the same with grains, fruits and vegetables."

Is Not a Theorist.

"I want to make it clear that the demonstrator is not a theorist, but is strictly practical. He has the research work of government experts in all lines to call upon. He can get the very best facts and figures on a cattle disease, a poultry disease or for the eradication of insects attacking fruit."

"The demonstrator works under the direct supervision of the government and also, of course, in harmony with the chamber of commerce and county commissioners. His work is supervised by a district agent who, in this case, will be J. L. Quickall, of the Waco headquarters. There are six of these state agents and they make inspection of all points in their district. Besides this there are 10 or 15 government experts in various farming lines who are making trips to the demonstrator's territory at different intervals.

"This demonstration work has proved to be a great success. I have seen it grow from six demonstrators 11 years ago to a total of 1600 this year. This growth means that the farmer received a full measure of benefit or the service would never grow to its present proportions."

Increases Land Values.

"In some of the counties in southern Texas where land was not worth 10 cents an acre when we began this demonstration work, the land is now worth \$3 and \$40 an acre."

"In many communities we have women demonstrators, who help the girls and women with their garden, teach them canning and preserving, household and kitchen sanitation and other work that makes their better wives and mothers. It teaches them to conserve what they have plenty of in the summer for the time when they have none of it in the winter."

Mr. Proctor thinks such a demonstrator would be worth trying in the El Paso valley. He says it would be possible

U. S. SOLDIERS ARE SHOT DURING RIOT AT PANAMA

Colon, Panama, April 3.—An investigation by Brig. Gen. Clarence R. Edwards and Panama authorities into a riot in the restricted district here Friday when Corp. Langdon, United States coast artillery, was killed and three other soldiers were wounded. The soldiers were engaged in patrol duty. The shooting was the outgrowth of an argument between a soldier, who is said to have been drinking, and the Panama police.

The shooting occurred near the ball grounds where a team representing the Fifth United States Infantry was playing the Cristobal nine. Some 2000 soldiers of the Fifth, Tenth and 31st infantry regiments who were witnessing the ball game, became greatly excited upon hearing of the shooting. Some missiles were thrown and several persons were injured. The excitement continued until army officers arrived and ordered the men to take trains for their stations.

MEXICAN ARRESTED ON COMPLAINT OF WOMEN

When Mrs. F. L. Gilmore and Mrs. J. R. Day were returning to their homes on Colima street Friday evening a Mexican approached them and grabbed Mrs. Day, according to Mrs. Gilmore.

The women screamed and the police arrested the man, who gave the name of Jose Canzaco, who was docketed at the police station on the charge of harassment.
